ISO 9712 LEVEL 2 PREPARATORY TRAINING SCHEDULE **MARCH 2023 TO JANUARY 2024**

**“It is good to have Education, It is better to have Experience,
but it is essential to have TRAINING!”**

Note: For other courses like NDT Level I & II, ASNT Level III (RT, PT, UT, MT, VT, ET, LT, Basic), CSWIP 3.1, 3.2, AWS and API courses please refer separate schedules or visit our website.

ISO 9712 LEVEL 2 PREPARATORY TRAINING PROGRAM

Insight Quality Services has conducted the ISO 9712 Level 2 and Level 3 preparatory training programs for the last 10 years. We have refined these programs every time and eventually have built a solid foundation to conduct these programs with excellent training material developed by us, more than 8 ASNT Level III and 2 ISO 9712 Level 3 qualified faculty, thousands of practice questions etc. This is a preparatory program for candidates aspiring to take Level 2 exams as per ISO 9712 (previously, EN 473). The program is aligned as per syllabus from ISO 25107. All applicable standards are covered and hands-on practical's and mock up examination is included in the program. We are happy to announce our ISO 9712 Level 2 Preparatory Training Program schedule here. Please register for the same to start your Level 2 career. The examination for these programs is conducted by M/s TUV Nord at the end of the training courses.

There is quite a difference between the ISO 9712 Level 2 examinations and the standard SNT- TC- 1A related NDE Level II examinations as per written practice. Generally, we are used to handle ASME standards and its terminology. The European basic terminology, standards and requirements are different. We should take into consideration that it will take us efforts to absorb this, and that this will need time.

The other thing is that this needs a higher input level from the candidates. These examinations are not difficult, but for a better understanding and to ensure success, it needs systematic efforts, hard work and a practical background. Also, the charges for these examinations are very high and such investment needs assured returns. So, organizations recommending candidates for examination should ensure the following things about the candidate:

- 1) He / she should be a diploma, degree or science graduate. A 12th standard pass may have issues in understanding the standards and his / her capabilities need to be doubly ensured.
- 2) He / she must have hands-on experience. He /she will be given samples for testing independently with no instructions on testing, which have to be created by them.
- 3) He / she must have theoretical background too. We expect them to be SNT-TC -1A NDT Level II and we always recommend you to send such candidates for further upgrading. Further we would ask you to recommend only those Level II candidates with a higher level of understanding and exposure, for good results.

However, we assure you our best efforts as usual to train and upgrade them to the best of our abilities.

Thanking you,

Diwakar Joshi
Director
