AWARENESS TRAINING ON WELDING SYMBOLS / SYMBOLIC REPRESENTATION OF WELDING ON DRAWING

A weld joint can be represented on an engineering drawing by detailed sketch showing every details and dimension of the joint preparation it can be time consuming and overburden the drawing.

In this course we will discuss how to represent welding requirements on drawing symbolically as per ASME and ISO standards and comparison of requirements of both standards.

This program is useful for Designers, Welding Engineers, Production Engineers, QA/QC Engineers
