

Basic Metallurgy For Shop Engineers

 29TH JUNE 2024 : ONLINE (ZOOM)

 TIME: 9:30 AM TO 5.30PM

There is no engineering without materials. Engineers need to understand criteria for selection of materials, metallurgical characteristics controlling the properties, defects introduced during processing & service, characterization wrt microstructure & mechanical properties and various modes of failures .

WEBINAR WILL COVER:

Session I : Basic Principles of Metallurgy

Session II : Defects in Materials – Origin , Nature & Significance

Session III : Mechanical Properties and Testing

Session IV : Corrosion & Corrosion Control

Session V : Introduction to Stainless Steels

Session VI : Discussion / Question & Answer

Shri. B.K. Shah has done B.Sc. Engg. (Metallurgy) from Regional Institute of Technology (RIT), Jamshedpur and M.Tech. (Corrosion Sc. & Engg.) from Indian Institute of Technology (IIT), Bombay. He joined BARC in 1973 (17th batch of BARC Training School) and retired as Head, Quality Assurance Division in 2011. He has been Outstanding Scientist and Raja Ramanna Fellow of the Department of Atomic Energy (DAE) His field of work : Quality Assurance, Material Characterization and Metallurgical failure analysis.
