

PHASED ARRAY ULTRASONIC TESTING (PAUT)

2 Days Awareness Training

TPI Perspective | Interpretation | Codes

About PAUT:

Phased Array Ultrasonic Testing (PAUT) is an advanced ultrasonic inspection technique that is widely adopted across industries for accurate and reliable defect detection.

Third-party inspectors and Authorized Inspectors are often required to witness PAUT examinations in accordance with applicable code requirements and provide acceptance decisions.

However, a clear understanding of calibration, scanning techniques, and signal interpretation is essential for effective assessment.

This 2-day awareness program is designed to equip participants with practical insights into PAUT, including:

- Basic principles and applications of PAUT
- Calibration procedures and scanning techniques
- Interpretation of PAUT data and signals
- Overview of relevant code and standard requirements

The program is especially beneficial for third-party inspectors and Authorized Inspectors, providing them with the necessary knowledge to confidently evaluate PAUT results and ensure compliance with industry standards.

DETAILS :

Training Date :

**29th & 30th May
2026**

Time :

9:30 AM - 5:30 PM

Venue :

**Hybrid
(Online + Offline)**

Fees :

**Please contact
us**

Last date of registration :

25th May 2026

To avail early bird discount, register and make payment by **16th May 2026**.

Reach out to us for **group discount** offer till **16th May 2026**.
